

The Paper (Novine)

Don't Believe Everything You Read

Set in a busy newspaper office, *The Paper (Novine)* lifts the lid on political corruption, crime, betrayal, and the lust for power, led by a cast of characters that will stop at nothing to achieve their goals. This critically-acclaimed Croatian series has created waves with all three seasons.

From the seats of the highest political powers in the country to the church, and from big business to the media and its role within the system, no sacred institution is safe in this searing cocktail of morality, greed and power.

The first two seasons of this gripping drama introduces us to those with their eyes on the prize within the political system, revealing the Faustian relationships that allow them to maneuver with impunity through the shadows and take what they want when they want.

These dark forces also seek to control the media and its output, but Novine holds firm, despite immense political pressure from all sides and their journalists' own foibles and flaws that often threaten to undermine them.

The third and final season examines the Croatian judiciary and how some corrupt politicians seek to control the very laws that govern the land.
