

Surviving 9/11

Two Hours That Changed The World: A 25-year Anniversary Special

Surviving 9/11: A 25-Year Anniversary Special is an ambitious, premium documentary that offers a profound re-examination of the events that changed the course of modern history.

Directed by BAFTA-winning director **Arthur Cary**, this deeply personal documentary tells two stories: the two-hour window in which terrorists hijacked four planes—three of which struck the Twin Towers and the Pentagon—and the 25 years that followed, as survivors and families continue to live with the legacy of that day.

Using immersive real-time storytelling, *Surviving 9/11: A 25-Year Anniversary Special* reconstructs the timeline of the attacks through compelling testimony from American and British participants, combined with personal and public archive material. These visceral, minute-by-minute accounts are interwoven with present-day scenes, revealing how lives were forever shaped by those events, and the lasting impact they still hold.

To mark the 25th anniversary in 2026, this award-winning documentary has been updated to ensure its continuing global relevancy to international audiences. *Surviving 9/11: A 25-Year Anniversary Special* is available to screen and buy now.
