

Trucking Hell: Ultimate Rescue Edition

Heavy Duty Rescue Missions On A Supersized Scale

This high-octane compilation series brings together the most dangerous and technically demanding recoveries from the long-running hit show *Trucking Hell*. Carefully curated from rescues taken across all nine seasons, these five episodes of *Trucking Hell: Ultimate Rescue Edition* showcase standout moments, daring feats, and extraordinary teamwork from the UK's top heavy recovery operators.

Have you ever driven past an accident involving a heavy goods vehicle and wondered how a fully-loaded, 40-ton truck is recovered? These heavyweight transport jobs require even larger vehicles to perform them, and a team of super-sized specialists to make them happen.

These five high-stakes episodes follow Britain's elite recovery crews as they tackle extreme challenges — from high-pressure mega rollovers and perilous water rescues, to intense bridge strike chaos, high-stakes after-dark recoveries, and relentless wild weather rescues. Each episode reveals the skill, precision, and sheer determination required to clear catastrophic crashes, submerged vehicles, crumpled bridges, night-time wrecks, and storm-battered roads, showcasing the crews who risk it all to keep the country moving.
